

Amendments to the Claims:

Please amend Claims 25 and 29 to read, as follows.

Claims 1 through 24. **(Canceled)**

25. **(Currently Amended)** A toner supply container detachably mountable to an image forming apparatus, said toner supply container comprising:

a rotatable container body for containing toner, said container body being provided at one longitudinal end portion with an opening portion for permitting discharge of the toner; and

a feeding member, provided for integral rotation with ~~which~~ said container body, for feeding the toner in said container body toward said opening portion, ~~opening~~;

wherein said feeding member includes a plate-like member extending substantially along a full-length of said container body, and

wherein said plate-like member is provided with projections, which are inclined relative to a rotational axis of said plate-like member and which are effective to guide the toner toward said opening portion with rotation of said container body, and

wherein said projections are provided at respective positions, which are different in a longitudinal direction of said container body, at least on one side of said plate-like member for feeding the toner adjacent the other longitudinal end of said container body toward said opening portion, ~~opening~~.

26. **(Previously Presented)** A toner supply container according to Claim 25, wherein said plate-like member is provided with a through hole between adjacent ones of said projections to allow the toner to fall from said plate-like member to stir the toner.

27. **(Previously Presented)** A toner supply container according to Claim 25, wherein said projections also are provided on the other side of said plate-like member at positions, which are different in the longitudinal direction.

28. **(Previously Presented)** A toner supply container according to Claim 25, wherein one of said projections is close to or contiguous with said opening portion.

29. **(Currently Amended)** A toner supply container according to Claim 25 or 27, further comprising a hollow extension extending from said opening portion, ~~opening~~, said extension including an opening at a free end thereof to permit discharge of the toner.
